Dear Hiring Team,

I am excited to apply for the BIM Intern position. As a final-year MSc student in Building and Architectural Engineering at Politecnico di Milano, I have developed a strong foundation in BIM modeling, energy-efficient design, and building physics. I am eager to apply my skills and continue learning in a dynamic professional environment.

During my internship at Aronica Company in Italy, I worked as a BIM Architect Assistant, where I developed 3D models, prepared execution files, and ensured integration between architectural and structural elements using Revit. My experience also includes working as an Architectural Designer at Effort Architecture Studio and Vida Architecture Studio, where I specialized in interior and exterior design, rendering, and visualization. These roles strengthened my technical proficiency in BIM workflows, problem-solving, and teamwork.

My technical skills include Revit (architectural, structural, and BIM coordination), AutoCAD, Lumion, Photoshop, InDesign, and Illustrator. I am currently learning Dynamo and VE software. I am particularly passionate about using BIM to enhance sustainable and energy-efficient building design, aligning with my academic research focus.

I am eager to bring my BIM expertise, creativity, and problem-solving mindset to your team. I would welcome the opportunity to discuss how I can contribute to your projects. Thank you for your time and consideration.

Sincerely,

Mahsa Moradian
