

# RESUME

Architect and architectural engineer with a strong focus on sustainability and innovative design solutions. Skilled in sustainable technologies, BIM methodologies, and energy class assessments, I combine technology and creativity to enhance design processes and improve project efficiency. My expertise spans environmentally conscious renovations, including SuperBonus 110% projects, sustainable material selection, and the strategic implementation of energy-efficient systems, as well as creating 2D and 3D project drawings and presentations to ensure that designs are both visually compelling and technically precise. Passionate about using design to create a positive ecological impact, I strive to contribute to projects that prioritize both aesthetic value and environmental responsibility.

## EXPERIENCE

### Freelance Architect

#### Present | Remote

- Developing architectural designs tailored to client needs and project requirements.
- Producing detailed 2D architectural drawings and 3D models, ensuring precision and visual clarity.
- Preparing preliminary and as-built project for municipal (for Turkey) approvals, adhering to regulatory standards and guidelines.

### Mirsolution S.r.l.

#### Junior Architectural Engineer | Office

#### March 23 - June 24 | Bergamo, Italy

- Worked extensively on energy efficiency renovation projects, including SuperBonus 110% initiatives, with a focus on improving building energy classes, facade renovations, and conducting detailed building surveys for as-built documentation.
- Managed 3D BIM modeling, executive drawings, and the creation of presentation boards.
- Played a key role in the office's transition to BIM certification by assisting in the implementation of BIM methodologies, development of efficient workflows.
- Led the office's rebranding efforts, overseeing brand identity creation, the development of portfolios and promotional brochures.

### Asteria Network

#### Post Graduate Internship | Office

#### July 22 - February 23 | Milano, Italy

- Worked on energy efficiency renovation projects, including SuperBonus 110% initiatives, focusing on residential projects.
- Was responsible for executive drawings, 3D models, client presentations, and technical outputs for both clients and the municipality.

## EXPERIENCE

### Temple Design

#### Junior Project Manager | Remote

#### December 21 - August 22 | Lecco, Italy

- Worked on organizing design sprints, scoping features, and prioritizing product roadmaps in fast-paced 0 to 1 development cycles.
- Collaborated with cross-functional teams, I learned how to translate high-level product goals into actionable development plans

### Building Biology & Ecology Institute

#### Intern | Office

#### October 21 - November 21 | Izmir, Turkey

- Analyzed energy class of the buildings and worked on the energy strategies utilized.
- Created technical drawings for the projects being developed, ensuring accuracy and compliance with energy efficiency standards.
