Hiring Team
SCE Project
Viale Sarca 336/f
20126 Milano, Italia

Dear Hiring Team at SCE Project,

I am writing to express my strong interest in the Architect position at SCE Project, a firm renowned for its innovative and integrated approach to architecture and engineering. With a solid foundation in sustainable design, BIM methodologies, and project management, I am eager to bring my expertise to your esteemed team and contribute to the realization of your transformative projects.

In my previous role as a BIM Specialist, I actively contributed to energy efficiency renovation projects, particularly within the SuperBonus 110% initiatives. My responsibilities included improving building energy classifications, designing façade renovations, and conducting detailed building surveys for as-built documentation. I played a key role in BIM modeling, executive drawings, and the firm's BIM certification process, where I optimized workflows and implemented methodologies to enhance project efficiency. Additionally, I contributed to the development of architectural visual communication materials, ensuring that project presentations and documentation were both technically rigorous and visually coherent. My proficiency in Revit, AutoCAD, and computational design tools enables me to deliver comprehensive and detail-oriented architectural solutions.

Currently, as a freelance architect, I focus on developing architectural designs tailored to client needs and project requirements. My recent projects involve producing detailed 2D architectural drawings and 3D models, ensuring precision and visual clarity. Additionally, I prepare preliminary and as-built projects for municipal approvals in Turkey, adhering to regulatory standards and guidelines. This experience has reinforced my ability to manage complex projects while maintaining a strong commitment to sustainability and design excellence.

Beyond my technical expertise, I thrive in dynamic, collaborative environments where innovative thinking and problem-solving drive project success. My experience in both design and project execution has equipped me with a holistic approach to architecture, allowing me to develop solutions that are both aesthetically compelling and functionally efficient. I am particularly drawn to SCE Project's commitment to designing high-performance buildings through interdisciplinary collaboration.

I would welcome the opportunity to further discuss how my experience and vision align with SCE Project's goals. Thank you for considering my application. I look forward to the opportunity to contribute to your exceptional projects.

Warm regards,
Cansu Usumegezzer
